

Joana Chicau [PT] is a media designer, creative coder, researcher – with a background in classical & contemporary dance – currently based in The Netherlands. She runs a transdisciplinary research project which interweaves media design and web environments with performance and choreographic practices. Chicau has been researching the intersection of the body with the constructed, designed, programmed environment, aiming at widening the ways in which digital sciences is presented and made accessible to the public. She has been actively participating and organizing events with performances involving multi-location collaborative creative coding/algorithmic improvisation, open discussions on gender equality and activism.
